PROFESSIONAL EXPERIENCE

Full Stack Developer | Applied AI Engineer

Jan 2025 – Present

LetUsCode Systems Pvt. Ltd.

- Built a production **RAG + agentic AI** platform using **OpenAI tool/function calling, LangChain, Pinecone (vector DB), and LLM workflows** for document Q&A and real-time actions (APIs, DB ops, workflows).
- Implemented an **ingestion + embedding** pipeline: **Firecrawl** and **LangChain** (auto-cleaning, chunking) → **text-3-embedding-large** → **Pinecone** for high-quality vector indexing.
- Implemented **hybrid retrieval + reranking** (semantic + keyword) with tuned Pinecone indexing, improving answer relevance and reducing hallucinations.
- Designed structured-data querying with **DuckDB + LangChain SQL Agent** (NL→SQL) over CSV/Excel via S3, enabling precise financial and operational answers in chat.
- Implemented Dockerization and **CI/CD** pipelines using GitHub Actions for automated deployment of AI and backend services.
- Delivered a **document parsing and order automation** pipeline using **Docling + NuExtract 8B** to map invoices/orders into canonical JSON and trigger ERP order creation.
- Shipped the automation system in **~6 working days** and replaced **3-4 manual analysts; lower cost** than managed OCR (**Amazon Textract**) while maintaining high extraction accuracy.
- Deployed GPU-based **microservices** (Docling, NuExtract 8B) on AWS (g5.4xlarge), exposing **FastAPI** endpoints and integrating with Python backend for scalable document processing
- Built a **Laravel + Filament** multi-marketplace platform integrating **Shopify, Amazon, Walmart, Wayfair, Houzz, and eBay** for synchronized product and order workflows.
- Optimized backend reliability using **Redis queues/workers/cron**, reducing marketplace sync errors by **60%**.
- Deployed and maintained production systems on **AWS (EC2, RDS, S3)** with **Nginx, Redis, Supervisor, and HTTPS** across AI and full-stack products.

Backend Developer

Jan 2024 – Dec 2024

ProtechGenie

- Developed secure backend modules for a fintech platform (**PCI-DSS Level 1**), implementing encryption and tokenization for sensitive data.
- Integrated payment gateways (**Stripe, PayPal, Braintree**) enabling reliable and secure transactions.
- Implemented Twilio-based SMS payments and WebRTC for real-time secure communication.

Software Engineer

Aug 2023 – Dec 2023

Mobzway Technology

- Developed modular real-time gaming UIs using **ReactJS** and **WebSockets**.
- Improved rendering performance by optimizing memory-intensive components.
- Collaborated with design and QA teams to enhance user experience and stability.

TECHNICAL SKILLS

AI / ML: RAG, LLMs, OpenAI, LangChain, Pinecone (Vector DB), OpenRouter, Prompt Engineering

Backend & Frameworks: PHP, Laravel, CodeIgniter, Node.js, Express, FastAPI, Flask, Filament, Livewire

Frontend: ReactJS, JavaScript, TypeScript, Inertia.js, Alpine.js, HTML, CSS, Tailwind

Database & Storage: MySQL, Redis, DuckDB, Amazon RDS, S3

APIs & Integrations: REST APIs, Webhooks, Shopify API, Amazon SP-API, Walmart, Wayfair, Houzz, eBay, Amazon Textract, Clerk Auth

Payments & Comms: Stripe, PayPal, Twilio, WebRTC

DevOps & Tools: Git, AWS (EC2, S3, RDS, Lambda), Docker, Nginx, Supervisor, Linux, Postman, GitHub Actions, Cursor

PROJECTS

KrishiMart (Freelance Project)

- Built and deployed a live e-commerce platform used by real customers (**URL:** krishimart.in) using **Laravel**.
- Implemented end-to-end workflows including product catalog, order management, and payment processing.
- Developed and published a companion **Flutter** app integrated with backend services.

AxesInExcess (Freelance Project)

- Developed a custom e-commerce platform and admin panel for a live client (**URL:** axesinexcess.com) using **Laravel**.
- Built features for product management, order workflows, and backend operations with a scalable architecture.
- Implemented secure APIs and optimized performance for smooth user and admin experience.

Real-Time Chat Application

- Built a real-time messaging system with **WebSockets** (instant messaging, groups, file sharing).
- Implemented async jobs and a scalable backend using **Laravel + Redis**.

Multi-Vendor E-commerce Marketplace

- Developed a full-stack marketplace with vendor dashboard and role-based access.
- Integrated Stripe payments and SSR using **Laravel + React (TypeScript)**.

Social Media Website

- Built a social platform with timelines, posts, and interactions.
- Implemented backend using **Laravel** and frontend with **Vue.js + Inertia.js**.

EDUCATION

- **B.Tech in Computer Science & Engineering** - UTU | GPA: 6.7 (Dec 2023)
- **Higher Secondary (10+2) in WBCHSE** - MMVV Vidya Mandir | GPA: 8.72 (May 2019)
